

CARVIN

Bolt on Neck Bass Controls

Passive electronics features the two Volume controls and a passive Tone control.

The Active/Passive electronics utilizes an 18v circuit with two 9v batteries. The passive tone control functions as passive whether the bass is set to Active or Passive. The tone control is also a Push/Pull switch. The bass is in Active mode when the tone control is down. When pulled up, the bass is in Passive mode.

The stacked knob control features Active Bass and Treble controls with 18dB of cut and boost.
