

BRX

BASS CABINETS

Congratulations on your selection of the **BRX** bass system. Carvin's **BRX** series delivers tight bottom end, crisp articulation, and accurate tonal reproduction. The **BRX10** and **BRX12** feature state-of-the-art Neodymium low frequency drivers with tight, smooth high frequency Titanium compression drivers. Both of these models, as stand alone cabinets, reproduce the full bass guitar range from the deep tones of a low B string to the snap of a G string slap. The **BRX18**, featuring one cast 18" large magnet 4" voice coil woofer, offers the finest in extended high power low frequency reproduction. The **BRX** series cabinets incorporate 13-ply Baltic Birch plywood construction for high efficiency and road worthiness. Every BRX cabinet is equipped with large caster plates to accept the optional **CT535** (set of 4) 3 1/2" casters.

RECEIVING INSPECTION

INSPECT YOUR SPEAKER FOR ANY DAMAGE which may have occurred during shipping. If any damage is found, please notify the shipping company & CARVIN. SAVE THE CARTON & ALL PACKING MATERIALS. In the event you have to re-ship your unit, always use the original carton and packing material. CARVIN and the shipping company are not liable for any damage caused by improper packing. SAVE YOUR INVOICE. It will be required for warranty service if needed in the future. SHIPMENT SHORTAGE. If you find items missing, they may have been shipped separately. Please allow several days for the rest of your order to arrive before inquiring.

RECORD THE SERIAL NUMBER on the enclosed warranty card. Return the warranty card with your name and comments to us.

BRX Cabinets

BRX10

- Four Neodymium 300w 10" woofers, One horn tweeter
- Imp: 8Ω, power handling: 1200 Watts
- Freq. Resp: 26Hz - 22kHz
- Size: 24W x 20D x 26.75"H, WT 99 lbs

BRX12

- Two Neodymium 300w 12" woofers, One horn tweeter
- Imp: 8Ω, power handling: 600 Watts
- Freq. Resp: 30Hz - 22kHz
- Size: 24W x 20D x 26.75"H, WT 83 lbs

BRX18

- One heavy-duty 18" cast frame woofer
- Imp: 8Ω, power handling: 800 Watts
- Freq. Resp: 24Hz - 2kHz
- Size: 24W x 20W x 26.75"H, WT 95 lbs

LIMITED WARRANTY Parts and labor are covered for 1 year on manufacturer's defects. Warranty does not cover burned out drivers caused by excessive power or distortion, or physical damage caused by general use, moisture or dust. **CAUTION:** Square wave distortion from power amps can destroy drivers much faster than clean RMS power.

SERVICE In the USA, please call 800-235-2235 for a RMA # (return authorization number). Write this number on the box and enclose a description of the problem. Prepay to 12340 World Trade Drive, SD, CA 92128

Outside the USA, contact your dealer or go to <http://www.carvinworld.com> for your nearest service center. Include a written description of the problem with serial number and date of purchase.

CARVIN

TYPICAL SETUP

BRX enclosures feature four input/output jacks (two 1/4" and two Speakon) wired in parallel. Connect the BRX INPUT to any audio amplifier capable of 8 ohm operation. Connect additional BRX enclosures from the EXT.SYSTEM jack to the INPUT of the additional enclosure (be sure the amplifier is capable of 4 ohm operation).

The BRX10 and the BRX12 feature a HIGH FREQUENCY ATTENUATION (dB) switch for accurately adjusting the high frequency level. This is a positive lock switch preset at six levels of attenuation. A good starting point for this switch would be in the -6dB position, or straight up 12 o'clock. As you turn the switch CCW the attenuation doubles to -12dB, then to -24dB, and finally OFF turns the high frequency driver off. Switching CW the attenuation halves to -3dB and then 0dB which turns the high frequency driver full on.

Carvin suggests the B-series and R-series bass heads to power the BRX cabinets.

B500
500w mono block bass Head

B1500
